WORK EXPERIENCE

2016 — Front-End Developer
Elon University
Lead developer updating the iMedia department website, moving it to a new CMS while discussing goals with stakeholders and ensuring the site is designed and implemented to work on all platforms.

2010-2015 — Software Engineer
The Iconfactory
Primary responsibilities included front-end development on various iOS and Mac applications, managing beta distribution, and writing release notes and knowledge-base documentation.

2008 — Intern
Cisco Systems
Interned in Cisco Systems' IT department in Research Triangle Park, North Carolina. Wrote documentation and created a JSP project for an internal services monitoring web application.

2010 — Director of Web Operations
FutureWeb Conference
Organizer of website development and content management for the FutureWeb conference at the Raleigh Convention Center in April of 2010.
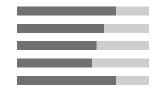

2006-2011 — Computer Technician
Elon University
Repaired computers; configured labs, including hardware and software installation, during the school year and set up new labs around campus during the summer.
